OVERLU
THE BEST NFT ON FLOW

JULY 2022

What is OVERLU

Hyper-evolution

- “OVERLU” was inspired by “Over” and “Evolution”, which means “Hyper-evolution” and “Overloaded”.
- A collection of composable NFTs.
- A dynamic upgradeable equity NFT asset.
- Owners are able to customize their unique appearances
- Unlock utilities by: upgrading components with different types of LU inserted, or extending slots of Model NFT.
- With visualized NFT evolution mechanism, we’re bringing you the richest playability and customization ever.

JULY 2022

Our Attitude

Intrinsic Utility-backed Value

- Serious homogeneity of NFT projects on the market: When you hear tech buzzwords like “NFTs” flying around, dismissing them as another fad destined to the dustbin of time is easy.
- The number of NFT contracts deployed on Ethereum has already exceeded 100K. Countless projects of different qualities are launched everyday. Our team refuses to be one of those 99% common projects.
- The scalability of NFT needs to be further deepened. Mostly NFT projects occupy absolute dominance in NFT collections. We as collectors can only choose to buy or not. Thus OVERLU recognizes this, being in a position where users are given more choices to make up a healthy part on the player base.
- Too many NFT "innovations" always focus on design, visual effect and modeling. But when you look deep into them, they are all the same nature with tiny changes. NFT should not be just a visual art. We won’t bother to join the superficial fray.
- People are tired of hearing bragging NFT stories, and not all people have the patience to understand lengthy information. We adhere to what you see is what you get, all information related to OVERLU is entirely transparent and open.
- Once utility is attached to NFT, the distinctiveness of NFT is solidified, the NFTs become unique and scarce.

JULY 2022

The Core of OVERLU

Hyper-evolution

- There is a collection of 10,000 PFPs based on FLOW Chain style, we set the main tone of the project as “SPORT+”, which is a dynamic NFT project in visual presentation.
- Behind the variable changeable attributes on body parts , NFTs will also correspond to the composability of owner’s utilities (explain in detail later)
- In the current NFT market, the utilities of NFT owners are nothing more than eligible airdrops, access to a certain group, physical empowerment, etc. which are essentially and functionally homogenized. These utilities are just equivalent to our one package, the rarity of their NFTs is only reflected in the differences in appearance components.
- But when we split these utilities up and derive more, randomly allocating to 10,000 NFTs, each split utility corresponds to different appearance modules. Meanwhile, owners will see NFT changes in appearance through his composable selections.

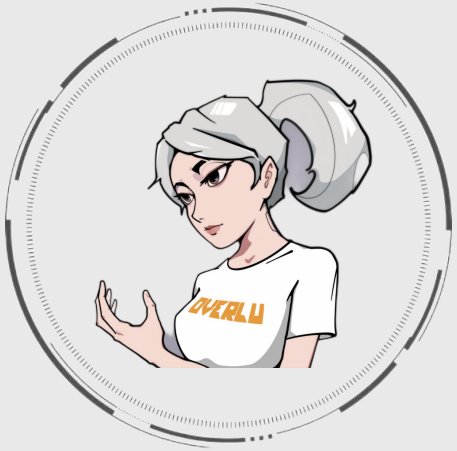
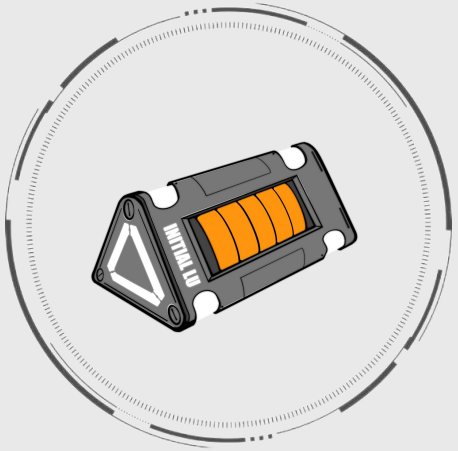
Types of NFT

Package



Model



DNA

The Package

- Package NFT is the beginning of everything, all DNAs and Models are from these 10,000 packages.

- Every collector who owns packages will be able to trade package on secondary market, or to obtain a Model and an Initial DNA by opening it.

The Model

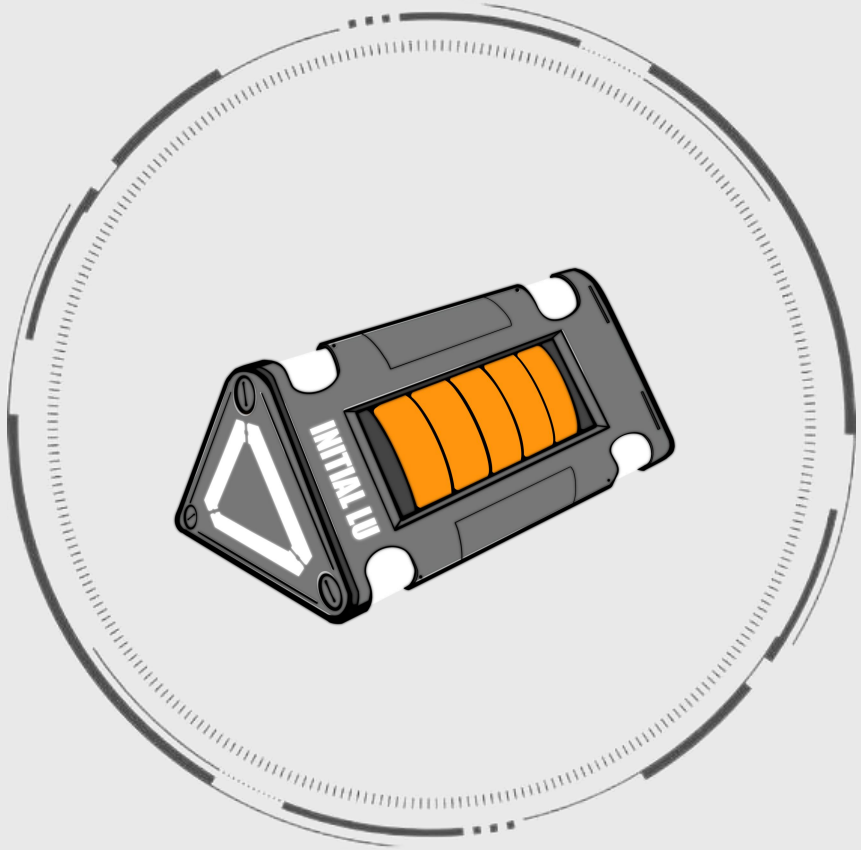
- The foundation of gameplay in OVERLU (a basic PFP), carrying the use of DNA and the appearance presentation of NFT. Each Model can carry 1 to 3 DNAs in the initial stage.

- Users are able to trade Model NFT in the secondary market, or to obtain corresponding utility and appearance change by inserting DNA to Model.

Types of NFT

DNA

- DNA is the core of the OVERLU project.
- It carries the holder‘s various utilities and appearance effects, brings more possibilities for extension and external collaboration in the future.
- DNAs can be traded in the secondary market, or insert to Model to obtain corresponding utility and activate appearance changes.



OVERLU

The Types of DNA

The DNA

- Insert the DNA into the Model, you will gain the eligibility of airdrops and physical empowerment, etc.
- After being activated, the Model NFT will display the appearance changes in body parts according to the attributes of DNA.
- Upgradeable body parts are as follows: hair accessories, face accessories, ear accessories, props, etc.
