← Skills

Skills

Acquire Skills to earn credentials and unlock earning opportunities.

Intro to NFTs

NFTs (Non-Fungible Tokens) are digital assets that exist on-chain. NFTs come in many forms, ranging from ape jpegs to blog posts to legal documents. Complete this Skill to learn how to leverage the power of NFTs for your next project.

Not Connected

Intro to DeFi

DeFi (Decentralized Finance) is about taking ownership of your money. Instead of passively holding money in a bank, you can use DeFi to earn active yield on your assets. Complete this Skill to learn how to put your money to work across web3.

Not Connected

Intro to DAOs

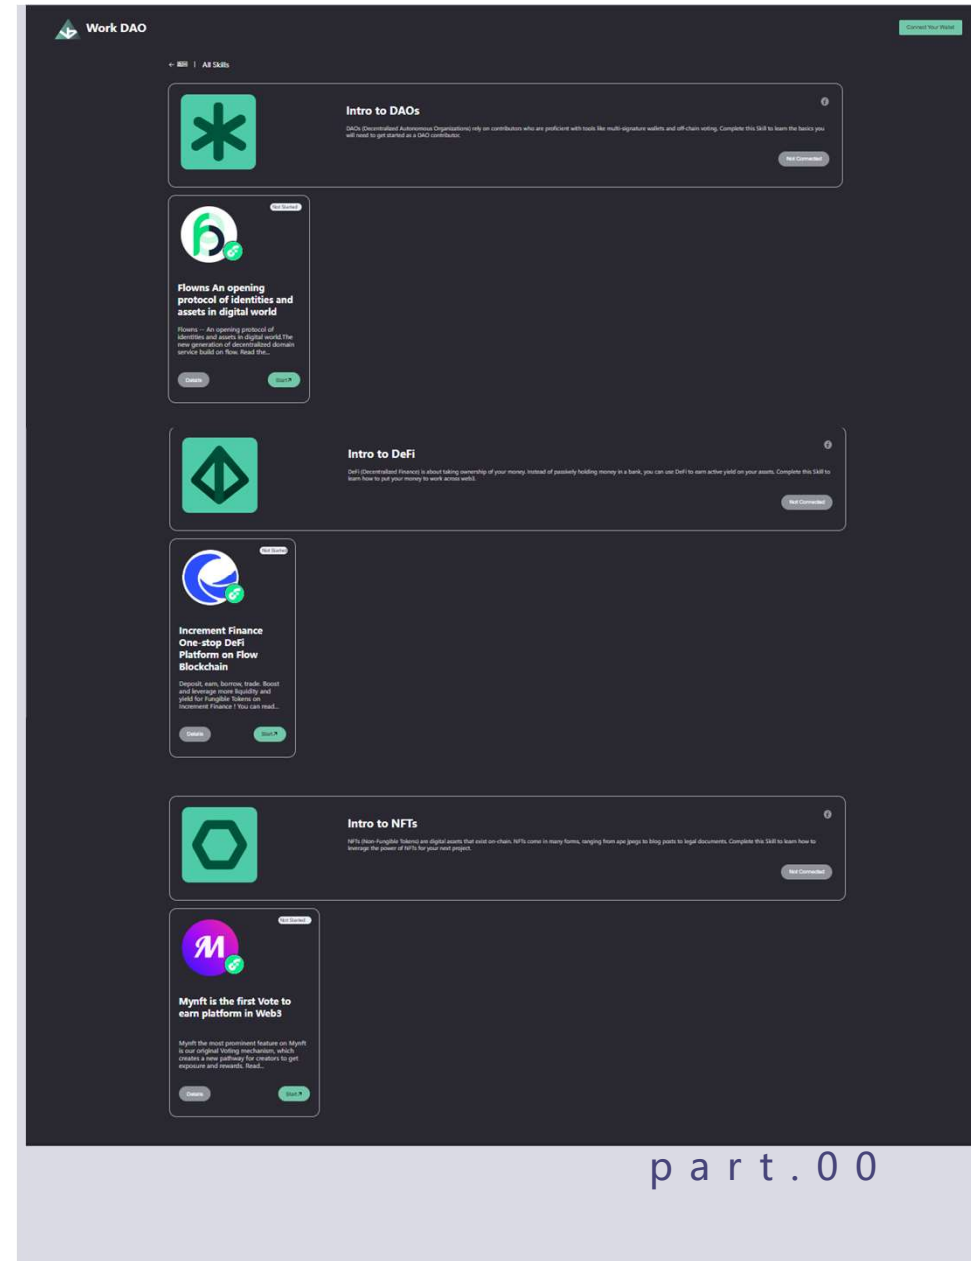

DAOs (Decentralized Autonomous Organizations) rely on contributors who are proficient with tools like multi-signature wallets and off-chain voting. Complete this Skill to learn the basics you will need to get started as a DAO contributor.

Not Connected

Project display

Our version will help new users to understand and familiarize themselves with their operation methods from the three sections of NFT, DAO, and DEFI, and of course, the use of the Flow ecological wallet.

Project background

Look at three sets of information:

1. China is a big country with a population of 1.4 billion, and mobile Internet users have reached everyone, see the figure below:

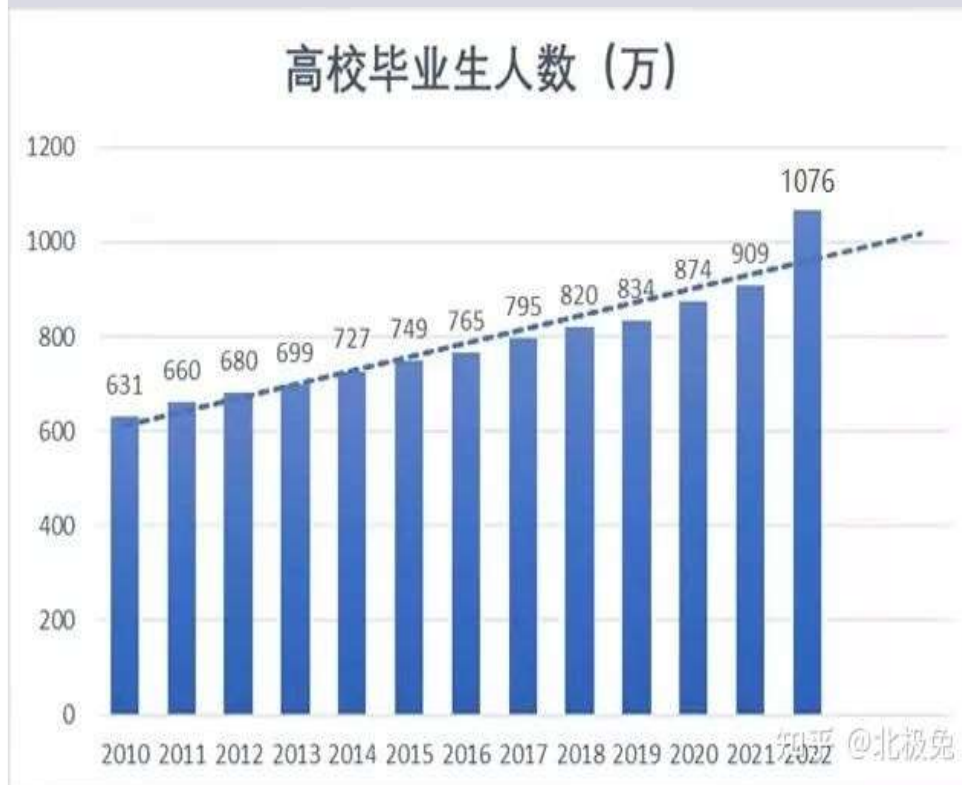

Project background

2. From 2021 onwards, Chinese Internet companies will start a wave of layoffs from online education to games, and even companies such as New Oriental (the first adult education company listed on NASDAQ in China) have almost completely changed their directions/path.

3. The number of graduates in China in 2022 is 10.76 million, And jobs cannot be fully in-taken, creates a huge gap between supply and demand

Project Vision&Introduction

Investors who invest in Amazon do not necessarily make money, but employees who work in Amazon and follow the listing must make money

- Start.Founder.WorkDAO

WorkDAO hopes to help more Chinese enter Web3 and become the builders of Web3 development.

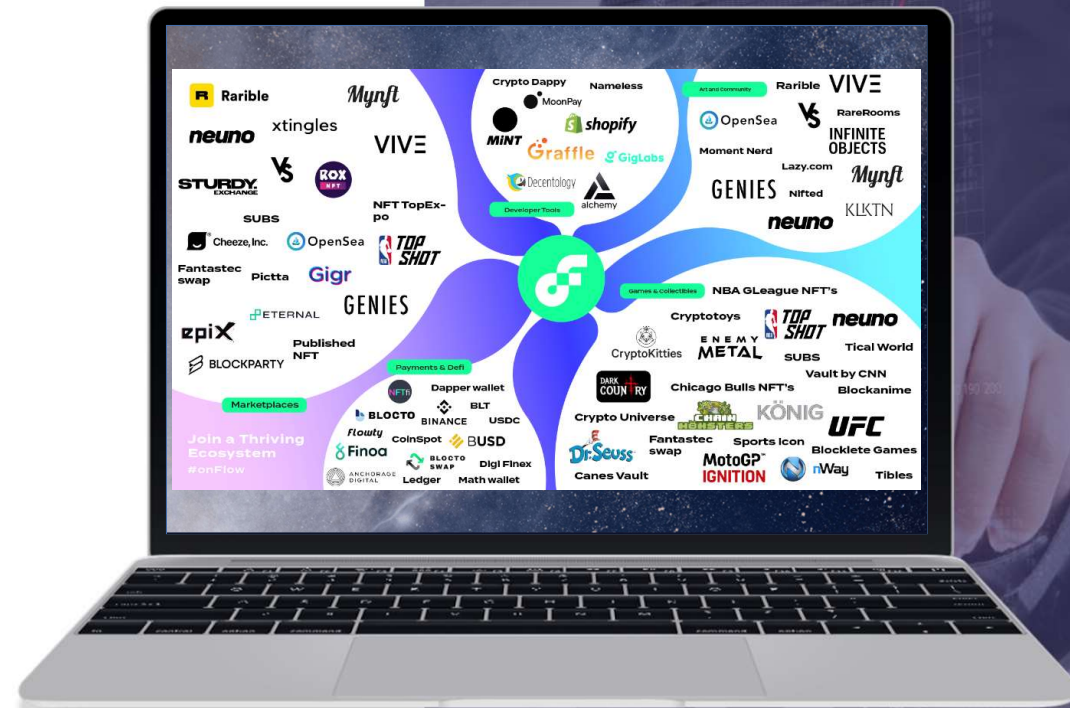

Project Vision&Introduction

WorkDAO is a DAO that helps Web2 users quickly enter Web3. The products include:

1. Provide Web3 required tool tutorials, low-cost participation methods, risk aversion experience, and track knowledge and investment analysis not limited to Flow, including: BTC, NFT, DAO, GameFI, DeFI;
2. Provide Web3 workplace course output to help users who want to enter Web3 find their way to participate in Web3 construction faster, including: operations, business, products, artists, etc.;

Project Vision&Introduction

3. Provide project recruitment services to help you find suitable and professional Web3 staff (collaborators);

4. Hold online and offline talent matchmaking meetings to help Web2 users understand the development of Web3;

5. Provide high-quality project incubation. The core staff of WorkDAO are senior entrepreneurial mentors, which can help start-ups to build teams suitable for projects faster, and help projects get early participation users faster.

Competitive project

1. SeeDAO

It just raised 30 million this year. At present, there are 8.8K people in the Discord community and 12K people on Twitter. It is mainly positioned as a Web3 incubator.

The initiator Tang Han is the second community ambassador of Flow China (I am the third stage).

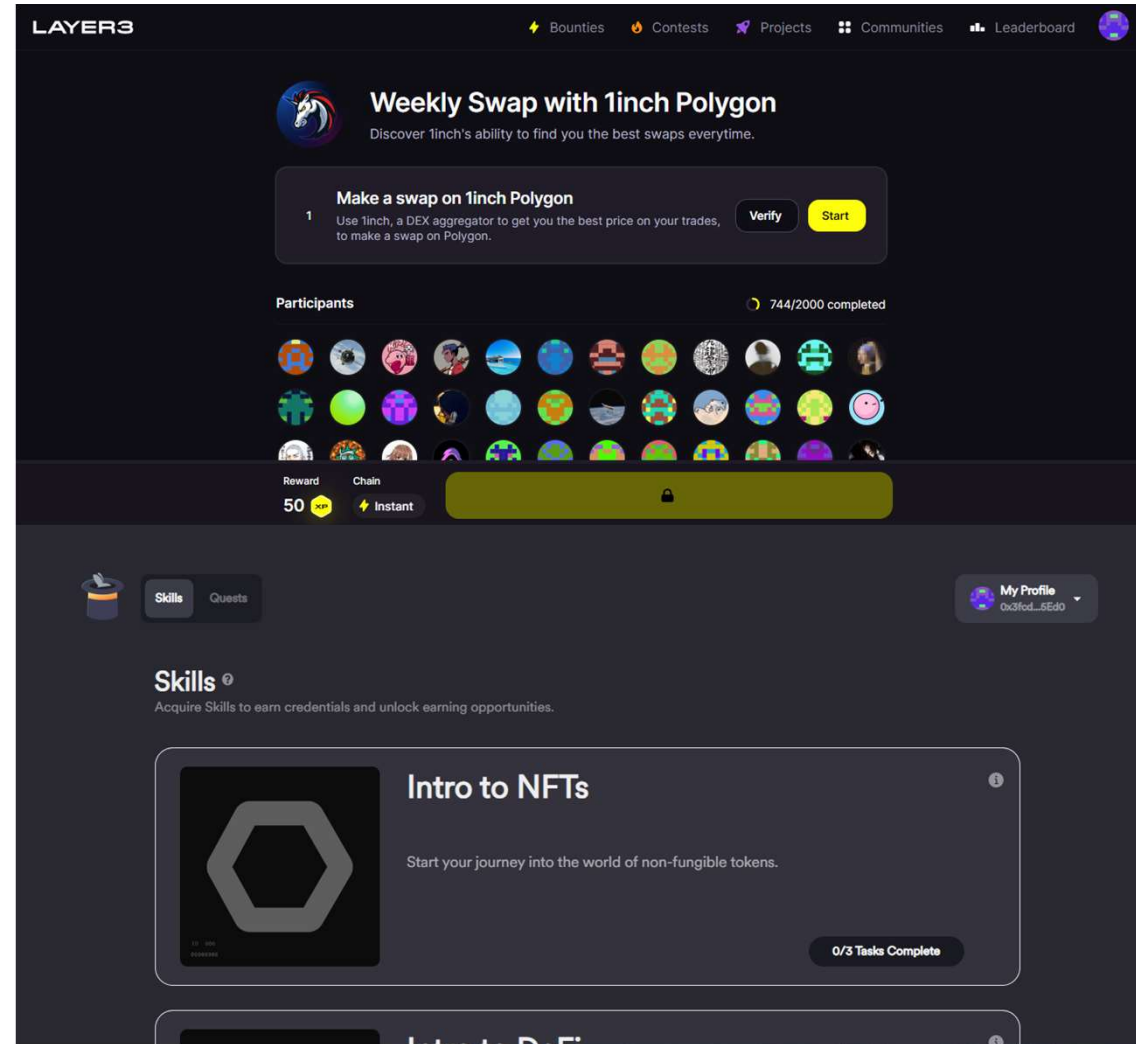

Competitive project

2. Rabbit Hole/layer3

A platform that focuses on Web3 learning. The way to participate is to learn the interactive experience of Web3 projects on its platform.

The platform will help newcomers to get familiar with the interactive experience of Web3 faster by linking wallets to project interaction, and participating in contributions to get bonuses.

Team introduction

The WorkDAO team is from InverseDAO, which is currently a very professional first-level investment paid community for Chinese.

The initiator Start is a deeply involved student and serves as the head of the publishing group. Currently, the new book "Zero-Based Excavation Web3" is under preparation and is expected to be officially launched in August. On the line, Start is also the ambassador of the Flow China community. Start has opened five bookstores and is one of the heads of 34 provincial-level administrative regions in China, a well-known education brand.

Team introduction

Tom Yaung

Software architect, ten years of software development experience

Core resources

WorkDAO core resources (that is, Start core resources)

1. InverseDAO (Head of Publishing Group):
An early first-level investment knowledge paid community in China, with a tuition fee of 0.25 ETH. There are currently 300 paid students, mostly project parties and investment institutions. There are 2000+ potential community users. The new book "Zero-Based Drilling Web3" that I am in charge of coordinating is being promoted with Peking University Press, with an estimated sales volume of 50,000 copies (Peking University Press will be promoted as a key book);

Core resources

MeebitsDAO (committee member): It is a DAO organized by Meebits players. Currently, 3,000 NFTs have been mint and 20,000 Twitter users;

ZorooDAO (head of BD): It is a community of 985 university graduates in China, bringing together workers from many Web2 factories, with a total of 5,000+ users;

321DAO (Investment Research Contributor): jointly initiated by members of well-known investment institutions, dedicated to finding potential projects, Azuki, Moonbirds and other projects are early participation and promotion communities, with 2000+ community members;

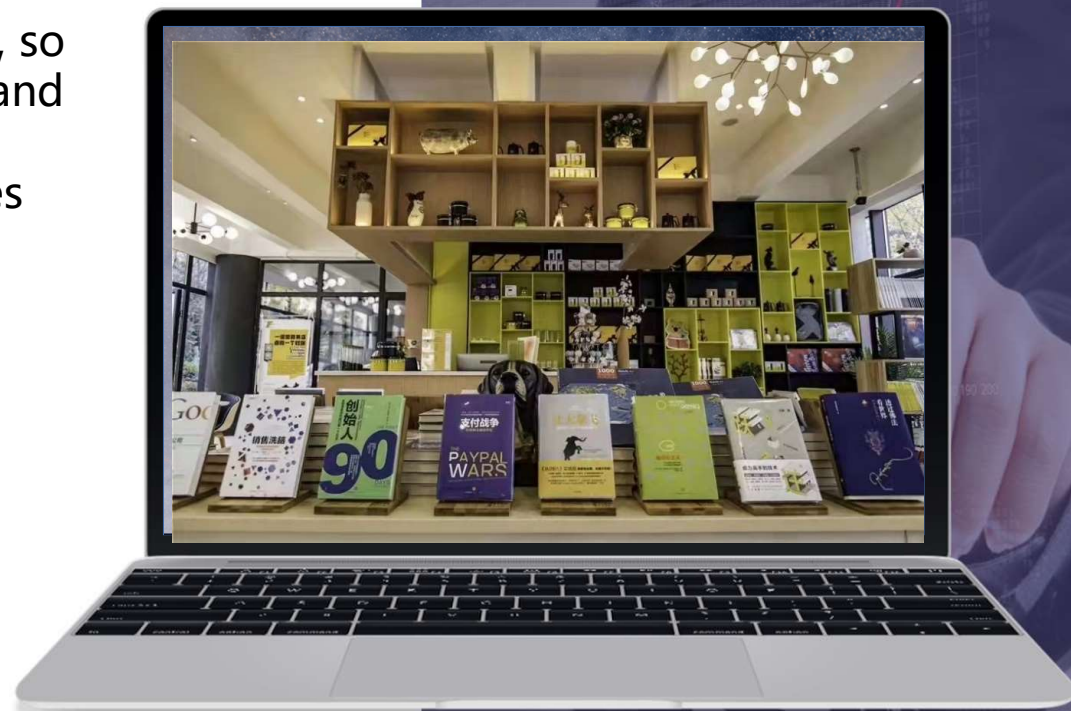

Start is the core contributor to the above communities, and the total users of these communities exceed 10K;

Core resources

2. He has opened five physical bookstores, so he has rich experience in offline activities and online operations, and is supported by physical venues, so he can do various types of activities at will;

Core resources

3. Fan Deng Reading, a well-known education brand, has nearly 100 million users in China and is currently the largest paid knowledge brand in China. During his tenure as the head of Tianjin, he gained a large number of Web2 users.

O

Success Stories

Xiaowei

Through understanding, his characteristics: lack of experience, good at writing and media operations, creative, experienced in community operations and event planning, and extremely enthusiastic about Web3.

Our strategy: It is recommended for early projects to quickly learn the project operation logic of the track from 0 to 1;

Success Stories

Xiaowei

Result: The newly established Miss Puff project accepted him and assigned him to be a Chinese community mod. Responsibilities: maintain the community's activity, do activities, and help the community operate new media accounts. One of the platforms has gained 8K+ fans, and the salary is 1ETH.

Success Stories

Amar

Through understanding, his characteristics: rich experience in community operation, participated in many projects, rich social network;

Our strategy: recommend to a number of mature companies, and the position is set as NFT project operation;

Result: Received an offer salary of \$3K per month from a listed company, helped the project party to formulate a roadmap and make a Deck, and obtained some community business cooperation opportunities, which has a certain out-of-the-circle effect.

Deposit Successful
